REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of "...a first hole portion, which is provided in a central portion of a trailing arm, a protruded protruding hollow cylinder portion passing through said first hole portion, and the protruded protruding hollow cylinder portion being provided on said vehicle body with a predetermined space from the supporting wall, a spring portion which is set and applied acts between an adjustable screw portion provided on the top of the hollow cylinder portion and an end portion of the first hole portion; and a second hole portion which opens in a horizontal direction to the other end portion at the other end of said trailing arm, wherein said trailing arm allows an axle of the rear wheels to be passed passes through said second hole portion and absorbs shocks transmitted from the axle of the rear wheels..." are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, Wu discloses substantially the claimed invention including a trailing arm; a bushing; a gearbox; a u-shaped groove; a hollow cylinder; a hole portion located at a vertical longitudinal position in the trailing arm; a spring (see *Office Action dated 15 May 2007*). However, the prior art fails to teach "...a first hole portion, which is provided in a central portion of a trailing arm, a protruded protruding hollow cylinder portion passing through said first hole portion, and the protruded protruding hollow cylinder portion being provided on said vehicle body with a predetermined space from the supporting wall, a spring portion which is set and applied acts between an adjustable screw portion provided on the top of the hollow cylinder portion and an end portion of the first hole portion; and a second hole portion which

opens in a horizontal direction to the other end portion at the other end of said trailing arm, wherein said trailing arm allows an axle of the rear wheels to be passed passes through said second hole portion and absorbs shocks transmitted from the axle of the rear wheels..."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
